Education

Karabük University – Computer Science

Karabük, Türkiye

I am currently in my fifth year of university, with the first year being a preparatory year. Over the past four years, I have decided to pursue a career in the field of backend development, blockchain and I am working diligently to improve myself in this area.

Osman Ulubaş Anatolian High School

Kayseri, Türkiye

In high school, I focused on improving myself technically in the fields of mathematics and physics. I began playing chess and participated in competitions in this area. Additionally, I formed a small game development team with my friends and together we created a few simple games.
